

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A method in a computer system for ~~designing~~ presenting under the control of a user a display of information, comprising the ~~steps~~ activities of:
 - (a) receiving instructions from the user to select a tabular format;
 - (b) in response to step (a), displaying to the user a menu of data selections, ~~which may be placed within portions of the~~ each data selection providing a cell arrangement for display in tabular format; and
 - (c) adjusting dimensions of ~~portions of the tabular format~~ a selected cell within a selected one of the cell arrangements to permit display of ~~the a data selections~~ selection.
2. (Currently Amended) The method of claim 1, further including the ~~step~~ activity of receiving instructions from the user via a manual pointing device.
3. (Currently Amended) The method of claim 1, further including the ~~steps~~ activities of:
 - displaying to the user a data selection menu including an entry representing a first waveform for possible display within a first ~~selected portion of the tabular format~~ cell within the selected cell arrangement;
 - receiving instructions from the user to display the first waveform within the first ~~selected portion of the tabular format~~ cell;
 - displaying to the user a data selection menu including an entry representing a second waveform for possible display within the first ~~selected portion of the tabular format~~ cell; and
 - receiving instructions from the user to display the second waveform within the first ~~selected portion of the tabular format~~ cell; and
 - simultaneously displaying the first waveform superimposed upon the second waveform within the first ~~selected portion of the tabular format~~ cell.

4. (Currently Amended) The method of claim 1, further comprising the ~~step~~ activity of displaying to the user a color selection menu listing possible background color choices for each ~~selected portion of the tabular format~~ cell of the cell arrangement.

5. (Currently Amended) The method of claim 1, further comprising the ~~step~~ activity of displaying to the user a file name selection menu displaying a region in which all previous user selections may be saved for future use.

6. (Currently Amended) A ~~display specification~~ method for providing a user interface display, comprising the ~~steps~~ activities of:

- (a) displaying an image set of predefined tables, each of said predefined tables having a plurality of cells in a predetermined arrangement;
- (b) selecting one of the predefined tables;
- (c) displaying, the predetermined arrangement of cells defined by the predefined table;
- (d) displaying a data selection menu for each cell appearing within the predefined table;
- (e) selecting one data set from the data selection menu for at least one cell; and
- (f) in response to the selection of step (e), adjusting the dimensions of some cells to permit legible data display.

7. (Currently Amended) The method of claim 6, further comprising the ~~steps~~ activities of:

- positioning an indicator of a manual pointing device over a border of a cell within the selected table;
- selecting the border of the cell over which the indicator resides;
- moving the indicator to a desired position; and
- selecting the desired position to define a new cell border location.

8. (Currently Amended) The method of claim 6, further comprising the ~~steps~~ activities of:

- positioning an indicator of a manual pointing device over a border of a column containing at least two cells within the selected table;
- selecting the border of the column over which the indicator resides;
- moving the indicator to a desired position;
- selecting the desired position to define a new column border location;

and

- redimensioning the cells within the column so as to abut the new column border location.

9. (Currently Amended) A computerized method of displaying medical data, comprising:

- obtaining at least a first and second stream of real time medical data;
- selecting a table from a menu of tables, each table in said menu including multiple cells in a predetermined arrangement;
- displaying ~~a~~ the selected table having multiple cells;
- manipulating a manual pointing device to select a first cell within the table;
- inserting the first data stream into the first cell;
- manipulating a manual pointing device to select a second cell within the table;

and

- inserting the second data stream into the second cell.

10. (Currently Amended) The method of claim 9, further comprising the ~~step~~ activity of displaying a display selection menu upon selecting a cell within the table.

11. (Currently Amended) The method of claim 10, further comprising the ~~step~~ activity of listing in association the display selection menu a choice of data and cell appearance submenus.

12. (Currently Amended) The method of claim 11, further comprising the ~~steps~~ activities of:

- saving the displayed table;
- creating a second table having multiple cells; and
- inserting the saved table 'into a cell of the second table.

13. (Currently Amended) The method of claim 12, further comprising the ~~step~~ activity of inserting a display generated in response to an internet connection into a cell of the second table.
